Navajo Reservoir

Ute Lake

Proposed Changes to 19.30.14

- Clarify decontamination protocols to include minimum standards agreed upon by western AIS Coordinators
- Expand options for issuance of Red Warning Tag to email and US mail
- Initiation of an Inspection and Decontamination Program

Required inspections for all conveyances or equipment when a watercraft inspection station is established

Mandatory inspection for all conveyances or equipment entering New Mexico

Advanced notice of transport for conveyances or equipment 26 feet or longer in length

Initiation of a inspection/decontamination seal and receipt program

Require all watercraft owners to “pull the plug” when transporting within New Mexico
