2022–2023 NEW MEXICO FURBEARER

RULES & INFO

Rules and Information for Furbearer Trapping and Hunting

wildlife.state.nm.us

Conserving New Mexico's Wildlife for Future Generations

A Message from the Director

The great outdoors can be a great escape from normal, everyday life; especially in times where few things seem normal.

Here in New Mexico, we are lucky to have plenty of opportunities to enjoy wildlife and the wild spaces they call home. Whether it's enjoying the rugged terrain of the Gila Wilderness, watching birds in the Bosque, fishing along the Pecos River or seeing deer graze in a high-mountain meadow, you're never far from a chance to get away.

New Mexico's wildlife and wild spaces can be your sanctuary when life gets hectic. I encourage everyone to get out and enjoy nature – and bring a friend or family member who's never had the chance to experience the great outdoors and all it has to offer. Your passion for wildlife and wild spaces could spark something in them.

A handwritten signature in black ink, appearing to read "Michael B. Sloane". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Michael B. Sloane,
Director – New Mexico Department of Game and Fish

Our Mission

To conserve, regulate, propagate and protect the wildlife and fish within the State of New Mexico, using a flexible management system that ensures sustainable use for public food supply, recreation and safety – and to provide for off-highway motor vehicle recreation that recognizes cultural, historic and resource values while ensuring public safety.

This booklet is only a summary of the laws and rules for furbearer trapping in New Mexico. For a complete and specific list of the laws and rules that govern hunting, fishing, trapping and other outdoor activities, view the appropriate statutes in Chapter 17, Chapter 30 and Chapter 66 NMSA 1978 and rules in 19.30.1 through 19.36.3 NMAC. In developing the Spanish edition of the Rules and Information Booklet, we tried to incorporate common Spanish terms and phrases. We realize that New Mexico has many Spanish dialects that have evolved over hundreds of years. If you need clarification on information in the Spanish booklet, or if you have suggestions on how to improve the translations in the document, please email DGF-Translation@state.nm.us

New Mexico Furbearer Rules and Information 2022–23 is published by the New Mexico Department of Game and Fish, One Wildlife Way, Santa Fe, NM 87507 © 2022. Cover: NMDGF photo.

IT IS ILLEGAL TO SET A TRAP OR SNARE ON PUBLIC LAND

EXCEPTIONS*

- Cage traps may be used to abate damages caused by any animal to property, crops, or livestock.
- Enrolled members of a federally recognized Indian nation, tribe or pueblo may use traps or snares solely for religious or ceremonial purposes.

***All general trapping regulations apply to the above exceptions, including:**

- Minimum setback distances on public lands
- No land set may be made within:
 - > 75 feet of a public road or trail
 - > 150 feet of a livestock or wildlife catchment, pond or tank containing water
 - > 1/2 mile of established and maintained public campgrounds or boat-launching areas, occupied dwellings without written permission of the occupant of the dwelling, signed and designated roadside rest areas, public picnic areas, and officially designated, mapped, maintained and marked trailheads.

Trapper Education

Licenses and General Information: www.wildlife.state.nm.us

Furbearer Education Requirements

Every person purchasing a Trapper License must complete a NMDGF-approved trapper education course before setting any trap or snare in New Mexico. Each person is required to complete the education course only once in their lifetime, and all courses are available free of charge. Proof of successful completion of a trapper education course in any other state will be accepted, but the NM Furbearer Law and Species Identification Course must also be completed.

Courses must be provided or approved by NMDGF. These courses provide: 1) essential information needed to be a responsible and ethical trapper, 2) the laws governing furbearer trapping and hunting and 3) information about furbearer species in New Mexico.

Please see the section below to determine which education course you will need to take. To enroll you must create or login to your account in the Online Licensing System (the same as when buying a license or applying for the draw). After logging in, all course options are available by clicking Trapper Education in the main menu. For assistance logging into your account contact the NMDGF Information Center: 1-888-248-6866. If you have previously purchased a license in New Mexico, but are unable to log into your account, DO NOT CREATE A NEW ACCOUNT! Please call for assistance.

Which Course Are You Required To Take?

Trappers Who Have Never Taken a Trapper Education Course

If you will set traps and/or snares, and you have NEVER taken a trapper education course (in another state or with a national association), then choose the 'New Mexico Trapper Education Course' option on our licensing website, or go to <https://conservationlearning.org>. This course satisfies all of the education requirements for setting traps or snares for furbearers and for hunting furbearers in New Mexico. You will need your NMDGF Customer Identification Number (CIN) to register for the course. Upon successful completion of this course, you will receive a Course Completion Certificate, your NMDGF account will automatically be updated and you will be able to purchase a license.

Trappers Who Have Taken Trapper Education in Another State

If you will set traps and/or snares, and you HAVE PREVIOUSLY taken a trapper education course through a different venue (another state wildlife management agency or an NMDGF-approved non-state entity), you are required to take the 'New Mexico Furbearer Law and Species Identification Course' found in the Trapper Education section on our licensing website. To determine whether a trapper education course is approved contact the NMDGF Trapper Education Program: (505) 476-8038. The New Mexico Furbearer Law and Species Identification Course focuses specifically on the regulations that must be followed in New Mexico and you must successfully pass a course quiz before a license can be purchased.

After the quiz, you will be asked for the trapper education number you received from that state association course. If you do not have that number, please email Nicholas.Forman@state.nm.us to receive verification of your previous trapper education course.

Trapper Education

Licenses and General Information: **1-888-248-6866**

Furbearer Hunting and Calling ONLY (no trapping allowed)

If you only hunt furbearers (you will not be setting traps or snares), you are required to complete the Hunt Only Course (New Mexico Furbearer Hunt Course) through your NMDGF account at onlinesales.wildlife.state.nm.us. This is an abbreviated version of the New Mexico Furbearer Law and Species Identification Course which covers only the information applicable to hunting furbearers. You must successfully pass a course quiz before a license can be purchased.

The Hunt Only Course does not cover trapping and does not satisfy the requirements to set traps or snares in New Mexico. If you think you might trap at any time in the future, you should complete the New Mexico Trapper Education Course, which meets all furbearer hunting and trapping requirements. It is illegal to set any trap or snare without having completed an approved trapper education course. NMDGF encourages all furbearer hunters to take the full New Mexico Trapper Education Course.

License Requirements

Licenses and General Information: www.wildlife.state.nm.us

While in the Field You Must Have All of the Following

New Mexico Residents

(see page 5 for residency requirements)

1. Trapper License: Required for all furbearer trappers and hunters 18 years of age and older. The license will display whether you are authorized to hunt and trap, or hunt only.
2. Junior Trapper License: Required for all furbearer trappers and hunters 12–17 years of age (Hunter Education also required if hunting furbearers).
3. Habitat Management and Access Validation: Required for all hunters, trappers and anglers, see page 4.
4. Habitat Stamp: Required for all hunters and anglers on U.S. Forest Service or Bureau of Land Management lands, see page 4.
5. Written Permission: All hunters and trappers on private lands must possess written permission from the landowner or person authorized to grant permission.
6. Trapper Education Certificate: All trappers that have completed Trapper Education in another state or jurisdiction but have not had NMDGF verify completion of an approved course must possess a certificate while in the field.

No license is required for residents 11 years of age or younger, however, all other laws apply. No license is required for residents who are taking nongame species.

Nonresidents

1. Trapper License: Required for hunting furbearers or trapping any furbearer or nongame species, for nonresidents 12 years of age and older. The license will display whether you are authorized to hunt and trap, or hunt only.
2. Habitat Management and Access Validation: Required for all hunters and anglers, see page 4.
3. Habitat Stamp: Required for all hunters, trappers or anglers on any U.S. Forest Service or Bureau of Land Management lands, see page 4.
4. Written Permission: All hunters and trappers on private lands must possess written permission from the landowner or person authorized to grant permission.
5. Trapper Education Certificate: All trappers that have completed a trapper education course in another state or jurisdiction but have not had NMDGF verify completion of an approved course must possess a certificate while in the field.

Nonresidents must possess a Nonresident Trapper License to hunt protected furbearers or trap any animal (furbearers and nongame). If you have any current New Mexico nonresident hunting license, you may hunt and possess nongame species (coyotes, rabbits and skunks), but you may not set traps or snares. To set traps or snares you must have a Nonresident Trapper License. Residents of states that do not allow trapping by New Mexico residents may not legally purchase a New Mexico Nonresident Trapper License.

Over-the-Counter (OTC) License Fees

License Type	Resident	Nonresident
Trapper License	\$20	\$345
Junior Trapper License	\$9	Not Issued
Game Hunting License	Not Applicable	\$65
(allows both small game and nongame hunting for nonresidents)		
Nongame Hunting License	Not Issued	\$65
Habitat Improvement Stamp	\$10	\$10
Habitat Management and Access Validation	\$4	\$4

(\$1 vendor fee will apply for all purchases)

Habitat Management and Access Validation (HMAV)

A habitat management and access validation (HMAV) must be purchased by all hunters and trappers, except individuals 17 years of age or younger, and 100% disabled veteran card holders. Only one HMAV is required per license year, and it can be used in conjunction with all trapping, hunting and fishing licenses. Fees are used to: lease access to private lands for public use; provide public access to landlocked public land; and improve, maintain, develop and operate State Game Commission property for fish and wildlife habitat management. If required, the HMAV will be added automatically to your shopping cart when the trapper license is purchased.

Habitat Stamp

A Habitat Stamp must be purchased by anyone age 12 or older hunting furbearers or nongame on U.S. Forest Service (USFS) or Bureau of Land Management (BLM) properties. This includes disabled veteran card holders. The stamp must be purchased once per license year and can be used in conjunction with all hunting, trapping, and fishing licenses. Funds from the sale of Habitat Stamps are used to improve wildlife habitat throughout New Mexico. A Habitat Stamp is not required to trap on private property or to hunt on other public or private property.

Military and Veteran Licenses

50% Discount for Resident Active Military and Veterans

New Mexico residents who are active duty military or veterans are eligible to receive 50% discounts on licenses, permits and stamps. The discount may be claimed when applying for or purchasing any license, permit or stamp online, at NMDGF offices, at license vendors or by telephone. Residents claiming this discount must be able to provide upon request proof of active duty military or veteran status. Discounts do not apply to: application fees, license vendor fees, administrative fees, the federal Duck Stamp or the Resident Disabled Veteran Game Hunting & Fishing License.

License Requirements

Licenses and General Information: www.wildlife.state.nm.us

New Mexico Residency Requirements

To qualify for New Mexico resident license(s), an individual must meet one of the following criteria:

1. A United States citizen who has resided in N.M. for a period of not less than 90 days immediately preceding the date of application (or purchase) for the license, has been domiciled in N.M., and has not claimed residency elsewhere for any purpose. Temporary or seasonal residents and home owners or P.O. box holders, who maintain a primary residence outside of N.M., do not qualify for resident licenses.
2. A citizen of another country who is legally in the United States and has actually lived in N.M. for at least 90 days immediately preceding his/her license application (or purchase).
3. A student, not otherwise entitled to claim residence, who is attending any educational institution in N.M., has attended and actually has lived in the state for at least one full semester immediately preceding the application (or purchase) for a license. Students must present a certificate or letter verifying their enrollment and attendance from the proper authorities of the educational institution.
4. A member of the U.S. military, not otherwise entitled to claim residence, who is permanently assigned to a military installation located within N.M. and who presents with his/her application a certificate or letter that verifies the military assignment and is signed by the commanding officer. The spouse or dependent of such person, living within the same household and similarly certified by the person's commanding officer may also purchase resident licenses.

License Refunds and Transfers

New Mexico Trapper Licenses are nontransferable and nonrefundable. For more information call the NMDGF Information Center: 1-888-248-6866.

License Information Is Public Record

Pursuant to the New Mexico Inspection of Public Records Act, Sections 14-2-1 et. seq. NMSA 1978, information provided when applying for licenses and permits is public record and must be disclosed to anyone when properly requested, except as provided by law.

Parental Responsibility Act

The Parental Responsibility Act requires the New Mexico State Game Commission to suspend the recreational and professional licenses of anyone who does not comply with court-ordered child support obligations. Hunting, trapping and fishing privileges are suspended until failure to pay court-ordered child support has been corrected and a \$25 reinstatement fee has been paid. For more information telephone NMDGF Field Operations Division: (505) 476-8065 or the NMDGF Information Center: 1-888-248-6866.

Fur Dealer License

A fur dealer license is required for any person, firm or corporation engaged in the business of buying or selling unprocessed skins or pelts of any furbearing animal in New Mexico. Trappers or hunters selling their own pelts and residents who purchase or sell less than 50 unprocessed pelts per year are exempt. Fur Dealer licenses may be purchased only at the NMDGF Santa Fe Office. To purchase a fur dealer license and for additional rules and restrictions please call the Field Operations Division at (505) 476-8064.

General Rules

Licenses and General Information: **1-888-248-6866**

Seasons and General Regulations

- There is no open season to hunt or trap mink, river otter, black-footed ferret, marten, or coatimundi.
- Nutria is a nonnative, invasive species that has caused extensive damage to wetland and riparian habitat in the United States. Their distribution is restricted in New Mexico to the Rio Hondo in Chaves and Lincoln counties. The trapping season for nutria is open year-round to prevent population increase and expansion.
- There is no closed season or bag limit for nongame species such as coyotes and skunks, however, hunters and trappers must still abide by NMDGF rules regarding trapping and hunting.
- State Game Commission Lands–Prairie Chicken WMAs are open to hunting furbearers and nongame species from November 1 to March 15, 2022 by individuals who hold a valid trapper license and HMAV stamp. For all other wildlife management areas each hunter must have written permission from NMDGF. Permission is not guaranteed. Restrictions may be placed on this permission, and this permission may be rescinded at any time for violations of the restrictions.

Seasons (statewide)

Badger, bobcat, fox, ringtail, and weasel	November 1, 2022–March 15, 2023
Beaver and muskrat	April 1–April 30, 2022; November 1, 2022–March 31, 2023
Nutria	April 1, 2022–March 31, 2023
Raccoon - all legal methods	April 1–May 15, 2022; September 1, 2022–March 31, 2023
Raccoon - restricted methods	May 16–August 31, 2022

(Restricted methods include cage traps, foot-encapsulating traps, and hunting).

Legal Shooting Hours

Restricted to the period one-half hour before sunrise to one-half hour after sunset except that a licensed furbearer hunter is authorized by NMDGF to hunt for and take raccoons by use of artificial light while hunting at night with a rim-fire rifle or handgun no greater in size than a .22 caliber, shotgun, bow or crossbow. The artificial light used for raccoon hunting must be a headlamp or hand-held flashlight. It is unlawful for any artificial light to be cast from a vehicle while raccoon hunting. Licensed trappers may check and remove furbearers or nongame from their traps at any time of day.

Legal methods of Taking Furbearers

Legal methods of taking furbearers include any sporting arm (see definitions, page 13), falconry, traps and snares. Restricted-use pesticides may not be used for the take of any furbearer. Raccoon may be hunted or trapped during the extended season with a current trapper license. Only cage traps and foot encapsulating traps are allowed for raccoon trapping during this period.

Hunting from Roads

You may not shoot at any protected furbearer from a road or from within the right-of-way fences of any maintained public road. If there is no right-of-way fence, you may not shoot at any protected species furbearer from any part of the maintained surface of the public road. A public road is any road, street or thoroughfare which is open to the public

General Rules

Licenses and General Information: www.wildlife.state.nm.us

or which the public has right to access and which has been paved, graded or maintained using public funds. In addition, you may not shoot at any protected species furbearer from within or upon a motor vehicle or aircraft. **Mobility Impaired Hunters** - Any licensed furbearer hunter who has a Mobility Impaired card is allowed to shoot at, take or attempt to take a furbearer, during the respective open season, from a stationary motor-driven vehicle, only if: 1) the vehicle has been parked completely off of the established road's surface; and 2) the established road has no right-of-way fence. The holder of a Mobility Impaired card may not shoot at, take or attempt to take any protected species furbearer from within the right-of-way fence on any established road.

Off-road Travel

Licensed hunters and trappers may not drive or ride in a motor vehicle which is driven off an established road on public land. Written permission is required to drive or ride in a motor vehicle off-road on private land. Exception: snow-mobiles, or vehicles used to retrieve game in an area not closed to vehicular traffic.

Check Requirements

All land sets must be visually checked every calendar day. Water sets must be checked at least once every other calendar day. A licensed trapper may designate an agent to check their set traps and snares on alternating check days, but the licensed trapper must personally check the traps every other check day. For example, for land sets operating Monday through Friday, the trapper checks Monday, Wednesday, and Friday and his or her agent checks Tuesday and Thursday. Any person may be designated as an agent for any licensed trapper, but the agent must possess written permission from the trapper and a valid trapper license. The permission must include the licensed trapper's full name, contact information, and the agent must know the location of traps.

Dogs

Dogs are allowed for hunting all furbearers during open season.

Artificial Light

It is illegal to use a spotlight or any other artificial light to hunt any furbearer (except raccoons, see legal shooting hours above) or nongame species including coyotes and rabbits, even if you are on private land and have landowner permission, unless you have an artificial light permit.

Bag Limits

The bag limit for mink, otter, masked or blackfooted ferret, Pacific (pine) marten and coatimundi is zero (0). It is illegal to harvest any of these species. For all other furbearer species there currently is no bag limit; however, NMDGF may set a bag limit annually for any furbearer species to address significant changes in statewide populations or to address critical NMDGF management needs. Annual bag limits, if set, shall expire March 31st each year.

Catchpoles

A release device or catchpole must be carried by trappers, and all captured animals must be removed or released from any trap or snare at the time of check. In cases where assistance is required for safe release of the animal, or when biological data is sought by NMDGF, the Department must be notified as soon as possible.

General Rules

Licenses and General Information: **1-888-248-6866**

Tampering with Traps

It is illegal to destroy, damage, disturb, steal or remove any trap, snare, or trapped wildlife without permission of the owner of the trap or snare. However, domestic animals caught in traps may be released at any time. New Mexico Law (Chapter 17-2-7.1, NMSA 1978) prohibits interference with another person who is lawfully hunting, trapping or fishing. To report illegal traps or other poaching activity call Operation Game Thief: 1-800-432-4263 as soon as possible. Removing or destroying traps (or other evidence) prevents officers from prosecuting poachers and is illegal.

Top: Foothold trap jaw spread. NMDGF photo.

Bottom: Recessed cubby.

Restrictions Applying to All Traps that Could Reasonably Be Expected To Catch a Furbearer

This includes traps set for nongame species such as coyotes and skunks.

Marking Traps and Snares

Each trap or snare must be either permanently marked with, or have a tag securely attached with, an NMDGF-issued user identification number or the name and address of the trapper using the trap or snare. Trappers may use either their Trapper ID number, if issued, or their Customer Identification Number (CIN) as a trapper ID.

Size Restrictions - Land Sets

No foothold trap with an outside jaw spread larger than 6 1/2 inches, or 7 inches maximum if laminated above the jaw surfaces, or tooth-jawed trap may be used in making a land set. No body-grip trap with an inside jaw spread greater than 7 inches may be set on land. Body-grip traps with inside jaw spreads of between 6 and 7 inches set on land must be recessed in a cubby at least 8 inches from the entrance.

Offsets

All foothold traps with an inside jaw spread equal to or greater than 5 1/2 inches used in making a land set shall be off-set a minimum of 3/16 of an inch between the contact surfaces of the closed jaws, unless they have been constructed or modified so that a portion of the jaw is padded with a soft material such as rubber or canvas.

General Rules

Licenses and General Information: www.wildlife.state.nm.us

Size Restrictions - Water Sets

No foothold trap with an inside jaw spread larger than 7 1/2 inches or body-grip trap with a jaw spread greater than 12 inches shall be used in making a water set. Body-grip traps used in water sets with a jaw spread of eight inches or more must be submerged in water to their jaw pivot or deeper.

Bait

It is unlawful to place, set or maintain any land set within 30 feet of any bait over two ounces in weight which is visible to airborne raptors. Bones that are entirely free of bait are legal.

Swivels

Each foothold trap set on land must have at least two separate swivel points in the anchor chain. At least one of these swivel points must be within six inches of the trap.

Anchoring

All traps or snares set on land must use stakes, chains, drags or other anchoring that will prevent any furbearer, coyote or wolf caught from escaping with the trap.

Breakaways

Any snare set on land must have a lock or break-away device which is designed to release or fail when a maximum of 350 pounds of pressure is applied to it. Locks or break-away devices must be attached in a way which leaves no part of the snare attached to an animal when it releases or fails. All snares must be securely anchored and cannot be attached to a drag. Exception: foot snares.

It is illegal:

Trapping Licenses

- To place a trap or snare on public land (see page 13)
- To hunt, trap or kill any furbearer without a trapping license.
- For any nonresident to trap for any species without having a trapping license.
- For any nonresident to hunt, kill or possess any nongame species without having a trapping license, nongame license or any big-game license.

Hunting /Trapping Areas, Seasons and Hours

- To hunt or kill furbearers outside of their established seasons.
- To hunt or kill a mink, river otter, black-footed ferret, marten, coatimundi, Mexican wolf or lynx or to intentionally trap for mink, river otter, black-footed ferret, marten, coatimundi, wolf or lynx.
- To hunt for furbearers outside of legal shooting hours.

Left to right: Drag, 18" stake, 24" stake and earth anchor (disposable type). NMDGF photo.

General Rules

Licenses and General Information: **1-888-248-6866**

- To cast the rays of artificial light (spotlight) into any field or pasture where big game or livestock may be while in possession of a weapon (even if you are only hunting nongame).
- To kill any endangered species.
- To hunt or trap on private land without written permission.
- To place or maintain a trap or snare on public land (page 13).
- To hunt or kill any beaver on public land within the Cibola, Lincoln or Gila National Forests.

Vehicles and Land Use

- To shoot at furbearers from a motor vehicle.
- To shoot at furbearers from or across any paved, graded or maintained public road or from within the fenced right-of-way of any paved, graded or maintained public road.
- To park any motor vehicle or camp within 300 yards of any man-made water hole, water well or watering tank used by wildlife or domestic stock without the prior consent of the private landowner, private-land lessee, public-land lessee or public-land management agency.
- To drive off-road or on a closed road on any public land.
- To litter and/or pollute streams, lakes and other waters.
- To leave a fire unattended or to improperly handle fire.

Checking Traps

- To not check land sets every calendar day. Trappers using an agent must personally check the traps every other check day.
- To not check water sets every other calendar day. Trappers using an agent must personally check the traps every other day.
- To not release or remove any captured animal at the time the trap is checked.
- For any trapper to not have a catch pole or other release device while trapping.

Trap and Snare Restrictions

- To use any trap on land that does not have at least two (2) swivel points in its anchor chain.
- To set any trap or snare on land without stakes, chains, drags or other anchoring such that any furbearer, coyote or wolf caught will be prevented from escaping with the trap.
- To use a foothold trap that has a jaw spread over 6.5 inches, or 7 inches if outside laminated in land sets.
- To use a foothold trap that has a jaw spread over 7.5 inches in water sets.
- To use a body grip trap with a jaw spread over 7 inches on land.
- To use a body grip trap with a jaw spread of 6 – 7 inches on land without the trap being recessed in a cubby at least 8 inches from the entrance.
- To use any body grip trap with a jaw spread of more than 12 inches in water sets.
- To use any foothold trap in a land set with an inside jaw spread of 5.5 inches or greater which does not have at least a 3/16-inch offset unless the trap has padded jaws.
- To use any trap or snare that is not permanently marked with or doesn't have a tag securely attached with, an NMDGF-issued user-identification number or the name and address of the trapper using the trap or snare.

General Rules

Licenses and General Information: www.wildlife.state.nm.us

It is illegal: — continued.

- To set any snare on land which does not have a breakaway device or lock that has been designed to fail at 350 lbs. or less.
- To anchor a snare with a drag.

Firearms and Manner and Method of Take

- To use or place poison to kill any furbearer.
- To discharge a firearm within 150 yards of a dwelling or building (not including abandoned or vacated buildings on public land) without the permission of the owner or lessee.
- To recklessly or carelessly handle a firearm.
- To hunt while under the influence of alcohol or other intoxicants, including marijuana.

Setback Distances

- To place, set or maintain any land set within 30 feet of any bait over two ounces in weight which is visible to airborne raptors.

Pelt Tagging, Reporting and Possession of Furbearers

- For any person to transport a bobcat or bobcat pelt out of the state before getting it pelt tagged, or for any person to possess a bobcat or bobcat pelt after April 14th annually which has not been pelt tagged.
- For any person to present a bobcat taken in another jurisdiction for pelt tagging in New Mexico.
- For any person to fraudulently present a bobcat for pelt tagging which was taken by another person or for any person to falsify pelt tagging or harvest reporting information.
- For any person to sell, trade, barter, possess or otherwise dispose of any bobcat pelt without it having been pelt tagged.
- To possess or transport any furbearer in a live condition.
- For any resident to purchase 50 or more untanned pelts without a fur dealer's license or for any nonresident to purchase any untanned furbearer pelts without a nonresident fur dealer license.
- For any fur dealer to charge a fee for pelt tagging any bobcat.

Tampering with Traps and Snares

- For any person to destroy, damage, disturb, steal or remove any trap, snare or trapped wildlife without permission of the owner of the trap or snare. Domestic animals may be released from a trap or snare by anyone.

Fur Dealers

A fur dealer license is required for any person, firm or corporation engaged in the business of buying or selling unprocessed skins or pelts of any furbearing animal in New Mexico (see page 5).

Mandatory Harvest Reporting

Harvest reporting is required for anyone who has purchased a trapper license, regardless of whether or not he/she hunted or trapped. Harvest reports must be submitted by April 7 for the 2021–22 license year. Reports submitted after the deadline will be charged an \$8 fee.

Failure to submit a harvest report will result in rejection of all draw license applications (deer, elk, etc.). False or fraudulent reporting can result in license privileges being revoked. Harvest Reports can be submitted online: <https://onlinesales.wildlife.state.nm.us> or by telephone: 1-888-248-6866.

Possession and Transfer

Transfer of a harvested furbearer or its parts to another person (except a licensed fur dealer) requires a possession certificate be provided to the person who is receiving the furbearer or furbearer parts. A sample possession certificate is provided and also available online: <https://www.wildlife.state.nm.us/publications/>.

It is illegal for any person to hold, retain, transfer, sell or attempt to sell live furbearers.

Possession Certificate

Use this certificate if you transfer a harvested furbearer or its parts to a person or organization.

I, _____ tel.: (____) ____-____,
Full name of license holder. Telephone number. Please print.

Address: _____
Address of license holder required. Please print.

on this day: ____/____/____ at: _____,
Date of transaction; Place of transaction.

hereby convey to: _____ the following game animal(s) or parts:
Full name of person receiving game animal(s) of parts.

Detailed description of the kind and number of animals donated or the kind, approximate weight and specific parts donated. (Example: one bobcat weighing approximately 22 lbs.)
for the purpose of: _____,
Donation, taxidermy and/or meat processing.

taken in GMU ____ under license #: _____ and taken on:
____/____/____.

Donor: _____ Recipient: _____
(Signature of license holder) (Signature of recipient)

By signing we understand and acknowledge to postdate, predate or otherwise falsify a Possession Certificate is unlawful.

Bobcat Pelt Tags

Licenses and General Information: **1-888-248-6866**

In 1978, NMDGF implemented mandatory bobcat pelt tagging in response to the International Union for Conservation of Nature (ICUN) prohibition on export of any bobcat pelt out of the United States without a permit from the U.S. Department of Interior. Bobcat pelts appear similar to several species of spotted cats which are considered endangered in other countries. Bobcat are not threatened or endangered in New Mexico or the U.S.; they are abundant in the state and can be found in every habitat type.

These regulations are defined by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), an international agreement between governments to ensure that international trade in plants and wildlife does not threaten their survival. CITES specifies that every bobcat harvested in New Mexico must have a pelt tag. The NMDGF pelt tagging requirement also allows for biological data collection to monitor total harvest, harvest distribution throughout the state, and bobcat population demographics.

All Bobcats Harvested in New Mexico Must Be Pelt Tagged

Every person who takes a bobcat in New Mexico must present the pelt for tagging in New Mexico prior to transporting the pelt out of the state, prior to selling the pelt, or no later than April 14, annually, whichever occurs first.

Pelts can be tagged at any NMDGF office or participating fur dealer. Hunters and trappers, except residents 11 years of age or younger, must present a current New Mexico trapping license at the time of tagging. There is no charge for pelt tagging at any location. A list of participating fur dealers is available by contacting the NMDGF Furbearer Program: (505) 476-8041.

Bobcats taken outside of New Mexico must be tagged in the state where taken and will not be tagged in New Mexico.

Be sure your pelt is properly tagged before attempting to sell it. Fur dealers may not purchase a pelt that has not been tagged.

Definitions

Licenses and General Information: www.wildlife.state.nm.us

Any sporting arm: Any firearm, muzzle-loader, compressed air gun, shotgun, bow or crossbow. All firearms, except handguns, must be designed to be fired from the shoulder.

Bait: The flesh, hide, fur or viscera of any animal. Bones free of flesh are not considered bait.

Body-grip trap: A rotating jaw trap designed to capture a furbearer by the body.

Foothold trap: A trap designed to capture a furbearer by the foot, but does not include foot encapsulating traps.

Foot encapsulating trap: Any trap with a push or pull-activated trigger located inside an enclosure recessed from an opening of no more than two inches in diameter, as measured across the opening from side to side, not corner to corner. Foot encapsulating traps include 'dog proof' and 'egg' traps.

Furbearer: Any quadruped defined as a fur-bearing animal in 17-5-2 NMSA 1978 (muskrat, mink, weasel, beaver, otter, nutria, masked or blackfooted ferret, ringtail cat, raccoon, pine marten, coatimundi, badgers, bobcat and all species of foxes). Not all furbearers may be taken (see Seasons, page 6).

Jaw spread: The distance between the jaws when measured across the center of the trap and perpendicular to a line drawn through the pivot points of the jaws when the trap is set.

Laminated: Any modification to the jaw thickness of a foot-hold trap by fastening a strip of metal (rod or flat stock) to the trap jaw, or a trap that is manufactured with cast jaws, which increases the contact surface area of the jaw.

Land set: Any foothold trap or snare set on land.

Public land: State-owned land, state-leased land, lands held in trust by the state, lands administered by the United States Fish and Wildlife Service, the United States Forest Service, the federal Bureau of Land Management, the National Park Service, the United States Department of Defense, State Parks and any county or municipality, but does not include the interior of physical structures or land belonging to or held in trust for an Indian nation, tribe or pueblo.

Snare: A wire or cable with a single closing device designed to capture a furbearer.

Trap: Any foothold trap, foot encapsulating trap, cage trap or body-grip trap set to capture a furbearer.

Water set: Any trap or snare set fully in water.

*Laminated trap.

Bobcat or Lynx

Licenses and General Information: **1-888-248-6866**

Know the Difference between a Bobcat and a Lynx

Bobcat are common to almost all habitats in New Mexico. Bobcats are closely related to the Canada lynx that inhabits the boreal forests of Canada and parts of the northern United States. Parts of northern New Mexico are classified as lynx range, and though there are no established populations here, transients may occasionally be observed.

A few key identification characteristics can help distinguish between a lynx and a bobcat:

Range: The only potential habitat for lynx is high elevation forests in the San Juan and Sangre de Cristo Mountains. If you are not in this area, then you will not see a lynx.

Body characteristics: Lynx have much longer legs in comparison to their body size, almost like a bobcat on stilts. They have larger feet for running on top of snow. The tufts on their ears are much longer, often two inches or greater.

Pelage (coat) patterns: The easiest way to distinguish a lynx from a bobcat, other than by its range, is the tail. Depicted in the pictures below, the tip of a bobcat's tail is black on top, and white on the bottom. In contrast, the tip of a lynx's tail is completely black. Another common difference, although there are exceptions, is lynx rarely have black spots or bars on the undersides and insides of their limbs.

There is no open season for Canada lynx in New Mexico. Any lynx caught while trapping in New Mexico must be released alive, and the incident must be reported to NMDGF within 24 hours. If you are not certain whether you have caught a bobcat or a lynx, please contact your local conservation officer or the NMDGF Furbearer Program: (505) 476-8041.

Mexican Gray Wolf

Licenses and General Information: www.wildlife.state.nm.us

The Mexican wolf is the rarest subspecies of gray wolf in North America, and therefore it is listed as a federal endangered species. Once common throughout portions of the southwestern United States, the Mexican wolf was almost eliminated from the wild by the 1970s.

In 1977, the U.S. Fish and Wildlife Service (USFWS) began efforts to conserve the species.

In 1998, Mexican wolves were released for the first time into the wild in the Blue Range Wolf Recovery Area, located within the Mexican Wolf Experimental Population Area. There are now at least 186 wolves distributed in at least 46 packs in Arizona and New Mexico. Mexican wolves primarily inhabit the Gila forest area of southwest New Mexico.

For trapping in the USFWS Mexican Wolf Experimental Population Area (MWEPA)—especially those areas located in portions of Catron, Grant, and Sierra counties—NMDGF strongly encourages use of techniques that minimize incidental wolf capture and potential injury, such as shortened chains, swivels, shock springs, and laminated, off-set or padded jaws on foothold traps. If signs are evident that wolves are present, avoid the area if possible.

If you are trapping in southwestern New Mexico, there is the possibility you will encounter the federally endangered Mexican wolf. If you capture a Mexican wolf, you must report the capture as soon as possible to the USFWS Interagency Field Team (IFT) to arrange for radio-collaring and release of the wolf. If the wolf is released or has pulled out of the trap, it must be reported within 24 hours. The USFWS can be contacted at 1-888-459-9653, or the NMDGF IFT representative at 1-800-432-4263.

To learn more about the Mexican wolf recovery program visit:
<https://www.fws.gov/southwest/es/mexicanwolf/>.

Background: Gray wolf paw print (actual size).

A coyote (left) and Mexican gray wolf (right) can be difficult to differentiate at a distance. Mexican gray wolves weigh two to three times more, have larger, blocky heads with more rounded ears, and feet larger in proportion to the body. Not all wolves have radio collars. Photo courtesy of the Mexican Wolf Inter-agency Field Team.

Releasing Animals

Licenses and General Information: **1-888-248-6866**

At times, you will catch animals that you do not wish to keep. You are required to carry a release device or catchpole to safely release these animals uninjured from your traps or snares. All captured animals must be removed or released from any trap or snare at the time of check. If you cannot release the animal yourself, NMDGF must be notified as soon as possible. You may not kill 1) any furbearer outside of the established season, 2) any furbearer for which there is no season, 3) any federal or state threatened or endangered species (including by the use of a body-grip trap or snare). If you capture one of these species, you must release it alive and unharmed. If the animal is injured, killed, or releasing it would be dangerous, your local NMDGF officer must be contacted as soon as possible.

Below: Catchpole used to safely release an animal.

NMDGF photo.

Operation Game Thief (OGT)

OGT is an anonymous tip line for reporting wildlife crimes that may have occurred anywhere in the state. Rewards are paid for any case in which charges have been filed, and a conviction is not required to receive a reward. OGT is funded solely through donations from individuals and organizations and not from tax or license fees. Rewards range from \$50–\$750.

OGT Hotline (24 hours, 7 days a week)
1-800-432-4263 or www.wildlife.state.nm.us/ogt

Beware of Rabies

Licenses and General Information: **1-888-248-6866**

In recent years, rabies has been detected in some furbearers in New Mexico. All mammals are capable of contracting rabies. Wild animals infected more often include skunks, foxes, coyotes, raccoons, bobcats and bats. Trappers should be aware of the potential risk of contracting rabies when harvesting an animal.

Rabies is caused by a virus that can be transmitted to humans through contact with the saliva, nervous tissue and/or brain tissue of a rabid animal. Rabies is transmitted only if the virus is introduced through a bite, contact with an open cut in the skin, or more rarely when infectious material such as saliva from a rabid animal gets into the eyes, nose or mouth. Some recommended precautions for trappers include:

- Wear protective gloves when handling and skinning animals. Open wounds or scratches increase the risk of infection when protective gloves are not used.
- Always err on the side of caution. Use goggles and a skinning apron if possible.
- Clean tools with a disinfectant such as a 10% bleach solution
- Wash thoroughly with soap and water, iodine solution or alcohol solution after handling and skinning animals.
- If bitten or otherwise possibly exposed to a rabid animal, thoroughly wash the area with soap and water and seek medical care as soon as reasonably possible.
- If attacked or bitten by a potentially rabies-carrying species, the animal may be required by law to be tested for rabies, depending on the species and the ability to retrieve it. Report the incident as soon as reasonably possible to your local NMDGF conservation officer for assistance with safely collecting the animal.
- The presence of rabies after skinning need not be a cause for concern, provided the skin(s) and tissues are dried completely. Drying renders the virus no longer viable or active.

Research Assistance

Licenses and General Information: www.wildlife.state.nm.us

Swift Fox vs. Kit Fox: Call for Samples

Kit fox and swift fox are closely related species that occur in New Mexico. They are similar in appearance, with yellow-gray coats on top that fade to a lighter shade on their undersides. The best way to distinguish between the two species is the location(s) where they occur and the type of habitat where they are found. There are a number of counties where both species occur (Chaves, De Baca, Eddy, Guadalupe, San Miguel, and Torrance), but each occur in different habitats in these counties. Swift fox are a grassland species, found in the shortgrass prairies of the Great Plains, and they occur only in the eastern half of New Mexico. Kit fox occur throughout lower and middle elevation shrubland, desert and desert-grassland habitats west of the Pecos River.

The NMDGF Furbearer Program is interested in working with trappers to collect samples from kit and swift fox to monitor these species across the state. Trappers and hunters can assist NMDGF by collecting tissue samples (a piece of the foot-pad about the size of a pencil eraser) from any kit or swift fox harvested. Samples can be stored in small paper envelopes at room temperature or in Ziploc bags in the freezer. Trappers who participate are requested to provide detailed location information for each sample, including the GPS coordinates (if possible), the county, township and range. Please call or email Nick Forman (505) 257-8701; Nicholas.Forman@state.nm.us to arrange for collection of your samples.

Kit Fox Range

Swift Fox Range

Collared or Ear-tagged Animals: Treat Them the Same

NMDGF conducts studies across New Mexico to monitor the state's furbearer populations. Some of these studies use GPS tracking collars or ear tags to track the animals across the landscape. The GPS collars store data about the animals' movement patterns, habitat preferences, and population survival rates.

Harvest of collared or ear-tagged animals is allowed. These animals may be treated the same as those not wearing a collar or ear tag, (e.g. If you have caught a collared or ear-tagged animal and would normally harvest it, you may do so. If you would normally release the animal, because of the sex, size, etc., you should do so as well). However, NMDGF requests you report the harvest and if applicable return the GPS collar for data recovery.

To report harvest of a collared or ear-tagged animal, contact the NMDGF Furbearer Program: (505) 476-8041, or the local NMDGF office or conservation officer. The cooperation and participation of trappers and hunters are truly appreciated.

Management Practices

Licenses and General Information: www.wildlife.state.nm.us

Best Management Practices (BMP)

The Association of Fish and Wildlife Agencies (AFWA) represents North America's agencies responsible for managing fish and wildlife resources to help advance sound, science-based management and conservation of fish and wildlife and their habitats in the public interest. AFWA worked with state wildlife management agencies, trapping organizations, veterinarians, and university researchers to develop BMPs for regulated trapping in the United States. This effort was motivated by a desire to improve the welfare of wildlife captured by traps, enhance the awareness and understanding of modern regulated trapping and sustain regulated trapping as a wildlife management technique. Common traps were extensively field-tested and evaluated based on five criteria: animal welfare, trap efficiency, trap selectivity, trapper & public safety and practical application. Data collection, including safety evaluations, was undertaken following widely accepted international standards for testing traps from the International Organization for Standardization (ISO). The resulting BMPs describe different types of traps, how they work, how traps should be set, and what training may be needed for people who use BMP traps.

The BMP program has demonstrated with science-based information that many models of traps, including footholds, can be used in a humane, selective, and efficient way. The set of recommendations, one for each of the harvested furbearer species in the United States, include practices, equipment and techniques that will continue to ensure the welfare of trapped animals, avoid unintended captures of other animals, improve public confidence in trappers and wildlife managers, and maintain public support for trapping and wildlife managers.

NMDGF develops regulations on trap types, size and modifications using the BMP recommendations. The majority of trappers use BMP recommendations when selecting traps, tuning and modifying their traps, and setting them in the field. You are strongly encouraged to read the BMPs for the species you trap, and use traps found in this resource. Modifications like off-set jaws, laminations, shock-springs, and swivels improve a trapper's productivity, ensure welfare of trapped animals, and improve public confidence in trappers and wildlife managers.

You can find BMPs online at:
<https://www.fishwildlife.org/afwa-inspires/furbearer-management>.

These recommendations have helped improve the humaneness and efficiency of traps and increase success when trapping.

Free GPS on Your Phone

www.blm.gov/maps/frequently-requested/new-mexico/hunting-maps

New Mexico Maps: Trapping & Hunting Areas, Land Status

BLM-New Mexico has partnered with the New Mexico Department of Game and Fish (NMDGF) to provide free maps of trapping and hunting areas on public lands. Download the CarryMap app to your mobile device, then download New Mexico maps at: www.blm.gov/nm/huntingmaps.

Some of the many features include:

- Up-to-date land-status maps.
- NMDGF Game Management Units, Wildlife Management Areas, Unitization Agreements and other designated areas.
- NMDGF Officer Districts and contact information.
- State Trust land hunting access points, lands withdrawn from hunting, and campsite locations.
- GPS mapping capability.
- Record tracks, mark waypoints, and share data.

Off-Highway Vehicles

Registration and information: www.B4uRide.com

RESPONSIBLE RIDING MEANS:

- Wear appropriate riding safety gear
- Register your OHV for public land use
- Prevent wildfires — OHVs must be equipped with a USFS-approved spark arrester
- Pick up your trash and pack it out
- Tread lightly on OHV trails
- Stay on designated trails — no off-roading
- Prepare and carry a survival kit
- Leave gates as you found them
- No harassing wildlife or livestock
- Be courteous to others on the trail

For More Information go to B4uRide.com

New Mexico Department of Game and Fish
Conserving New Mexico's Wildlife for Future Generations

Trapping serves an important role in the recovery of furbearer populations.

Not long ago, river otters had vanished from New Mexico. Through interagency efforts otters were trapped in Washington state and Louisiana and reintroduced in New Mexico. Today, a healthy and vital otter population thrives in the upper Rio Grande.
