

DEER PROPOSED RULE CHANGE SUMMARY

Date of update: 6/16/2026

**The Department remains actively engaged in reviewing biological data and considering public input as the rule development process progresses. Please check back regularly for updates and additional information as decisions are finalized.*

DEER BIOLOGY AND MANAGEMENT

Deer population growth is driven by both adult female and fawn survival. Adult doe survival is consistent across the mule deer range with only minor variability. Fawn survival on the other hand varies by region and across years, and it is heavily influenced by precipitation timing and quantity coupled with habitat conditions. Therefore, multiple years of good winter moisture and timely summer monsoonal rains are necessary to see significant deer population growth in New Mexico.

Because a single male can breed many females within a breeding season, more than 95% of females will be pregnant each year. Research indicates that pregnancy rates remain high unless buck numbers fall below 10 bucks per 100 does. Therefore, male mortality at or above this ratio does not meaningfully affect overall reproduction. For this reason, the Department primarily implements a male-only harvest strategy, as harvest of males does not negatively impact population growth under these conditions.

The Department uses two primary management strategies to meet diverse stakeholder interests: Standard hunts and Quality hunts. Standard hunts (also defined as opportunity hunts) are designed to maximize hunter participation while maintaining overall population health. These hunts typically have higher license numbers, higher hunter density, and a younger average age of harvested bucks.

In contrast, Quality hunts are designated to provide a more limited, higher-quality hunting experience. These hunts generally feature lower hunter density, higher success rates, an older average age of harvested bucks, and/or more favorable season timing and length. Quality hunt designations are established by the State Game Commission and involve more restrictive license allocations to maintain those characteristics.

For more information on deer biology and management in New Mexico, see this report:

PROPOSED CHANGES TO DEER HUNTING

Region Specific Proposed Changes

Northwest

- 1) Reduce deer licenses in GMU 2B based on input received during current rule cycle.
- 2) In addition to general license reductions in GMU 2B, based on input received during the current rule cycle, the Department analyzed the total number of license reductions required to move GMU 2B to a Quality Hunt unit. Moving GMU 2B to a Quality Hunt unit would require a reduction of 885 deer licenses across public and private land (see table 1 below).
- 3) Create new rifle hunt code in GMU 51A to spread out pressure. The overall license numbers will remain the same.
- 4) Create a public muzzleloader deer hunt on Wildlife Management Areas in GMU 4 to coincide with the private land hunt (10 licenses).

Southwest

- 1) Structure the January hunt on White Sands Missile Range (GMU 19 WSMR only) as a youth hunt.
- 2) Create a December rifle hunt for Coues white-tailed deer in GMUs 16 and 22 (20 licenses in each GMU) to be consistent with Coues white-tailed deer hunts in the southwest.

- 3) GMU 23 and 24 archery hunters who do not harvest an FAD, will no longer be permitted to hunt the Silver City Management Area antlerless hunt. A new hunt code will be created for the Silver City Management Area antlerless archery hunt (50 public licenses and 20 private licenses).
- 4) Change youth rifle hunts in GMUs 13 and 17 to youth muzzleloader hunts to match elk weapon type for the same time and increase licenses for muzzleloader hunts in these units.
- 5) No longer include Fort Bayard as a special management area. Hunters drawing a tag for GMU 24 can hunt any legally accessible land in GMU 24, including Fort Bayard management area.
- 6) Create a public rifle hunt for Mimbres River WMA in GMU 24 (5 licenses).

Southeast

- 1) Remove the REG antlerless hunt in GMU 32 Roswell and Fort Sumner Hunt Areas. Keep Youth Only antlerless hunt (15 public and 20 private licenses).
- 2) Remove the antlerless hunt on the Huey WMA; change the ES hunt to FAD bag limit.
- 3) Significantly reduce licenses in GMUs 29 (-120), 30 (-525), and 34 (-100).

Northeast

- 1) Adjust license numbers to meet management strategies and reflect changes in deer herd dynamics (see table 2 below).

General Statewide Proposed Changes

- 1) Adjust license numbers to meet management strategies and reflect changes in deer herd dynamics (Table 2).
- 2) Adjust season dates (Table 2).
 - a. Adjust season dates to ensure harvest is biologically sustainable.
 - b. Shift start dates to maintain hunts beginning on Saturday or adjusting to maintain consistent hunt structure.
 - c. When possible, adjust season dates for hunt structure consistency across the state.
 - d. Adjust season dates to avoid overlapping hunts with mixed-weapon types.
- 3) Designate the premium statewide deer hunt as a Quality Hunt.
- 4) Require the purchase of a license at least a day prior to the start of the hunt. For hunts where published season dates are less than 6 days, hunters will no longer be able to buy a license once the hunt starts.
- 5) Require a “ranch registration” process for OTC private-land deer licenses, similar to the current registration process used for private land elk hunting in Secondary Management Zones.
- 6) Implement a cap on private-land only OTC deer licenses for each GMU. If license distribution within a GMU is disproportionately skewed toward a particular hunt due to private land sales patterns, licenses will be redistributed to reduce that skew, though not necessarily distributed equally across all hunts (Table 3).

PUBLIC INVOLVEMENT

The Department continues to receive public comments. If you would like to comment on the proposals, please send an email to: DGF-Deer-Rule@dgf.nm.gov.

Table 1. Summary of changes to deer license numbers required to designate GMU 2B as a Quality Hunt unit.
