

Deer and Pronghorn Antelope

Deer and Pronghorn Antelope

Management Objectives:

- Restore herds to sustainable levels.
- Improve habitat on historic ranges
- Use “Adaptive Management” principles

Deer and Pronghorn Antelope

Trapping and Transplanting:

- Augment low density herds with individuals from high density situations
- Ensure success of releases with proven techniques in quality and accessible habitats
- Evaluate actions with long term monitoring

Deer and Pronghorn Antelope

Proposed amendments to the Deer Rule:

- Allow unsuccessful archers a chance to harvest a doe within Silver City Management Area
- Extend archery season for doe-only:
January 16 through February 5
